Regulatory Compliance Statements

This section provides the FCC compliance statement for Class B devices and describes how to keep the system CE compliant.

Declaration of Conformity

FCC

This equipment has been tested and verified to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Operation of this equipment in a residential area (domestic environment) is likely to cause harmful interference, in which case the user will be required to correct the interference (take adequate measures) at their own expense.

CE

The product(s) described in this manual complies with all applicable European Union (CE) directives if it has a CE marking. For computer systems to remain CE compliant, only CE-compliant parts may be used. Maintaining CE compliance also requires proper cable and cabling techniques.

RoHS Compliance

NEXCOM RoHS Environmental Policy and Status Update

This publication, including all photographs, illustrations and software, is protected under international copyright laws, with all rights reserved. No part of this manual may be reproduced, copied, translated or transmitted in any form or by any means without the prior written consent from NEXCOM International Co., Ltd.

RoHS restricts the use of Lead (Pb) < 0.1% or 1,000ppm, Mercury (Hg) < 0.1% or 1,000ppm, Cadmium (Cd) < 0.01% or 100ppm, Hexavalent Chromium (Cr6+) < 0.1% or 1,000ppm, Polybrominated biphenyls (PBB) < 0.1% or 1,000ppm, and Polybrominated diphenyl Ethers (PBDE) < 0.1% or 1,000ppm.

In order to meet the RoHS compliant directives, NEXCOM has established an engineering and manufacturing task force to implement the introduction of green products. The task force will ensure that we follow the standard NEXCOM development procedure and that all the new RoHS components and new manufacturing processes maintain the highest industry quality levels for which NEXCOM are renowned.

The model selection criteria will be based on market demand. Vendors and suppliers will ensure that all designed components will be RoHS compliant.

How to recognize NEXCOM RoHS Products?

For existing products where there are non-RoHS and RoHS versions, the suffix "(LF)" will be added to the compliant product name.

All new product models launched after January 2006 will be RoHS compliant. They will use the usual NEXCOM naming convention.

Warnings

Read and adhere to all warnings, cautions, and notices in this guide and the documentation supplied with the chassis, power supply, and accessory modules. If the instructions for the chassis and power supply are inconsistent with these instructions or the instructions for accessory modules, contact the supplier to find out how you can ensure that your computer meets safety and regulatory requirements.

Cautions

Electrostatic discharge (ESD) can damage system components. Do the described procedures only at an ESD workstation. If no such station is available, you can provide some ESD protection by wearing an antistatic wrist strap and attaching it to a metal part of the computer chassis.

Safety Information

Before installing and using the device, note the following precautions:

- Read all instructions carefully.
- Do not place the unit on an unstable surface, cart, or stand.
- Follow all warnings and cautions in this manual.
- When replacing parts, ensure that your service technician uses parts specified by the manufacturer.
- Avoid using the system near water, in direct sunlight, or near a heating device.
- The load of the system unit does not solely rely for support from the rackmounts located on the sides. Firm support from the bottom is highly necessary in order to provide balance stability.
- The network camera is provided with a battery-powered real-time clock circuit. There is a danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instructions.

Installation Recommendations

Ensure you have a stable, clean working environment. Dust and dirt can get into components and cause a malfunction. Use containers to keep small components separated.

Adequate lighting and proper tools can prevent you from accidentally damaging the internal components. Most of the procedures that follow require only a few simple tools, including the following:

- A Philips screwdriver
- A flat-tipped screwdriver
- A grounding strap
- An anti-static pad

Using your fingers can disconnect most of the connections. It is recommended that you do not use needle-nose pliers to disconnect connections as these can damage the soft metal or plastic parts of the connectors.

vi   NCb-301 User Manual

Safety Precautions

1. Read these safety instructions carefully.

2. Keep this User Manual for later reference.

3. Disconnect this equipment from any power sources before cleaning. Use a damp cloth. Do not use liquid or spray detergents for cleaning.

4. For plug-in equipment, the power outlet socket must be located near the equipment and must be easily accessible.

5. Keep this equipment away from humidity.

6. Put this equipment on a stable surface during installation. Dropping it or letting it fall may cause damage.

8. Make sure the voltage of the power source is correct before connecting the equipment to the power source.

10. All cautions and warnings on the equipment should be noted.

11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.

12. Never pour any liquid into an opening. This may cause fire or electrical shock.

13. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.

14. If one of the following situations arises, get the equipment checked by service personnel:
    a. The power cord or plug is damaged.
    b. Liquid has penetrated into the equipment.
    c. The equipment has been exposed to moisture.
    d. The equipment does not work well, or you cannot get it to work according to the user's manual.
    e. The equipment has been dropped and damaged.
    f. The equipment has obvious signs of breakage.

15. Do not place heavy objects on the equipment.

17. CAUTION: DANGER OF EXPLOSION IF BATTERY IS INCORRECTLY REPLACED. REPLACE ONLY WITH THE SAME OR EQUIVALENT TYPE RECOMMENDED BY THE MANUFACTURER. DISCARD USED BATTERIES ACCORDING TO THE MANUFACTURER'S INSTRUCTIONS.

Technical Support and Assistance

1. For the most updated information of NEXCOM products, visit NEXCOM's website at www.nexcom.com.

2. For technical issues that require contacting our technical support team or sales representative, please have the following information ready before calling:
   – Product name and serial number
   – Detailed information of the peripheral devices
   – Detailed information of the installed software (operating system, version, application software, etc.)
   – A complete description of the problem
   – The exact wordings of the error messages

Warning!
1. Handling the unit: carry the unit with both hands and handle it with care.

2. Maintenance: to keep the unit clean, use only approved cleaning products or clean with a dry cloth.

Conventions Used in this Manual

Warning:
Information about certain situations, which if not observed, can cause personal injury. This will prevent injury to yourself when performing a task.

Caution:
Information to avoid damaging components or losing data.
Note:
Provides additional information to complete a task easily.

Package Contents

The NCb-301 package contains the following accessories:

Quick guide

Chapter 1: Product Introduction

Overview

Key Features

- 3MP @30fps, Full HD 1080P @60fps
- Motorized lens 3-10 mm, F1.4
- Advanced P-Iris
- 100dB True WDR
- Micro SD card slot
- Support 0°C~60°C / 0°F~140°F

Hardware Specifications

Camera

- Image sensor: 1/3″ 3megapixel true WDR progressive scan CMOS sensor
- Minimum Illumination: B/W 0.01 lux/ color 0.1 lux
- Lens: Motorized (3-10mm, F1.4) lens
- Iris type: P-iris
- Day and night: Yes (true D/N)
- WDR: Yes
- Image Enhancement
  – Brightness, Contrast, Saturation, Sharpness, Backlight compensation, Mirror, Flip, Day/Night, Anti-flicker

Video

- Video compression: H.264/MJPEG
- Video streaming: triple streaming
  – H.264 Stream 1/ H.264 Stream 2/ MJPEG Stream 3
- Video resolution: 2048 x 1536 to 320 x 240
- Video quality
  – VBR/ CBR
- Frame rate
  – 2048 x 1536 @ 30 fps
  – 1920 x 1080 @ 60 fps
  – 1280 x 720 @ 30 fps
  – 720 x 576 @ 30 fps
  – 720 x 480 @ 30 fps
  – 640 x 480 @ 30 fps
  – 320 x 240 @ 30 fps

Audio

- Audio Streaming: Two-way
- Audio Compression: G.711 8KHz/ 16bit
- Audio Input: Line in
- Audio Output: Line out

Network

- Interface: 10/100/1000 Mbps Ethernet, RJ-45
- Supported protocols: HTTP, TCP/IP, UDP, RTP, RTSP, FTP, SMTP, DHCP, DNS, DDNS, NTP, uPnP, ONVIF, IPv4/v6
- Security: Multi-level passwords/ HTTP encryption

I/O Connector

- Audio in/ out Port: 1x 3.5mm phone jack
- D I/O: 1x DI, 1x DO
- Micro SD slot: Yes
- RJ45: Yes

Event Management

- Event trigger: Motion detection, DI
- Notifications: Trigger alarm output, email/ FTP and record video to PC or SD card
- Post-recording: Yes
- Pre-recording: Yes

Power

- DC: DC 12V/AC 24V terminal block
- PoE: Yes/ IEEE 802.3at (PoE+)

General

- Power consumption: 10W max.
- Weight: 650g
- Dimension: 145mm (D) X 73.27mm (W) X 64mm (H)
- Operating Temp.: 0°C~60°C / 0°F~140°F
- Humidity: 90% RH (no condensation)
- Certification: CE/ FCC
- Weatherproof: With housing
- Application: SDK available for application development

Chapter 2: Camera Configuration

Accessing the Camera's Configuration Menu (Graphical User Interface)

The camera's default IP address is 192.168.1.168, make sure the IP address of the computer accessing the camera is on the same network subnet before proceeding.

You can access the camera via a web browser or NexCam Assistant software included with the camera. The following information outlines the instructions for each method.

Installing NexCam Assistant

Note: If NexCam Assistant is already installed, you can skip this section and continue to the next section **NexCAM Assistant** on page 7.

1. Locate the installation file **NexCamAssistant-Setup.msi** on the CD.
2. Once located, double click on the file to start the installation program.
3. Click the **Next** button on the welcome screen to continue.
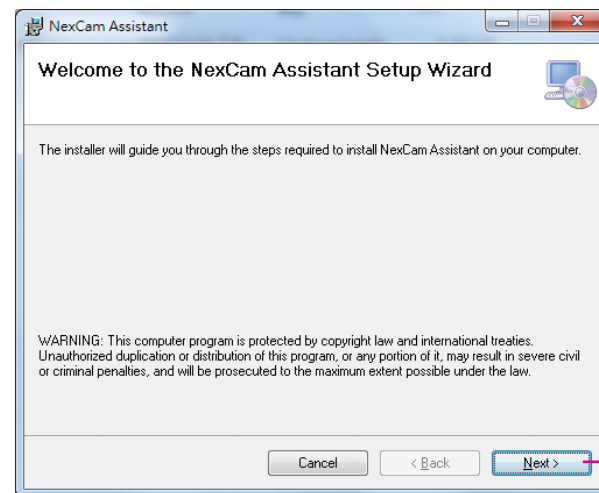

Next button

4. Confirm the directory that the program will be installed on. To specify a different folder, please click on the **Browse** button and locate the desired installation folder.

5. To check the available drives you can install the software to and their available and required disk space, please click on the **Disk Cost** button.
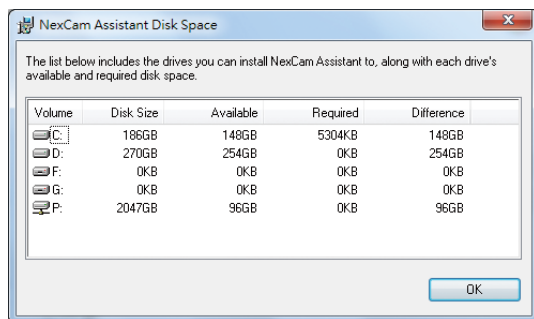

6. Specify which user accounts on the computer can access the program, the options are **Everyone** and **Just me**.

Browse button

Disk Cost button

Next button

User accounts
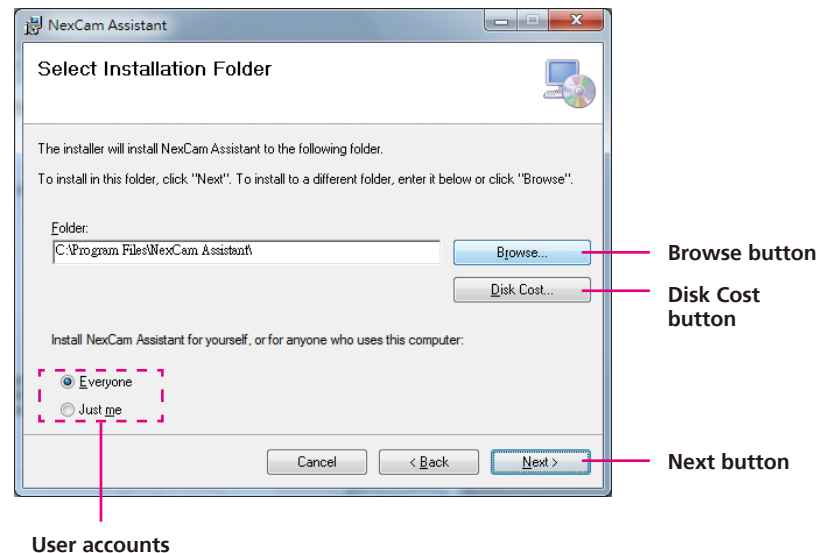

7. Click on the **Next** button to continue.

8. Click on the **Next** button to begin installation.
Next button

9. Once the installation process is complete, click on the **Close** button to finish. A shortcut will be created on the desktop.
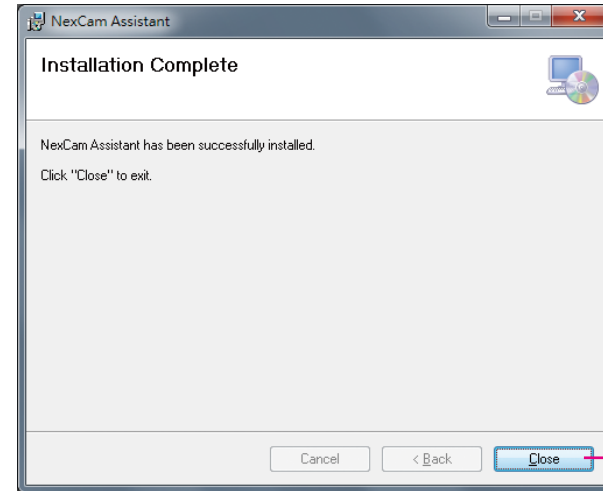

Close button

NexCam Assistant

1. Locate and open the NexCam Assistant software shortcut on the desktop.
2. When the program is launched, it will begin searching the network for the IP camera automatically (the search will last for up to 90 seconds). You can also manually search cameras by clicking on the **Search** button.
Note: Manual search will last for up to 90 seconds.

3. Once the camera is discovered, it will show the following information:
   - Model name
   - IP address
   - MAC address
   - UUID
   - Serial number
   - Version

4. Click on the **Home Page** button and it will launch the camera's configuration menu via Internet Explorer. You can also access the menu by double clicking the camera's **IP address** under **Camera List**.
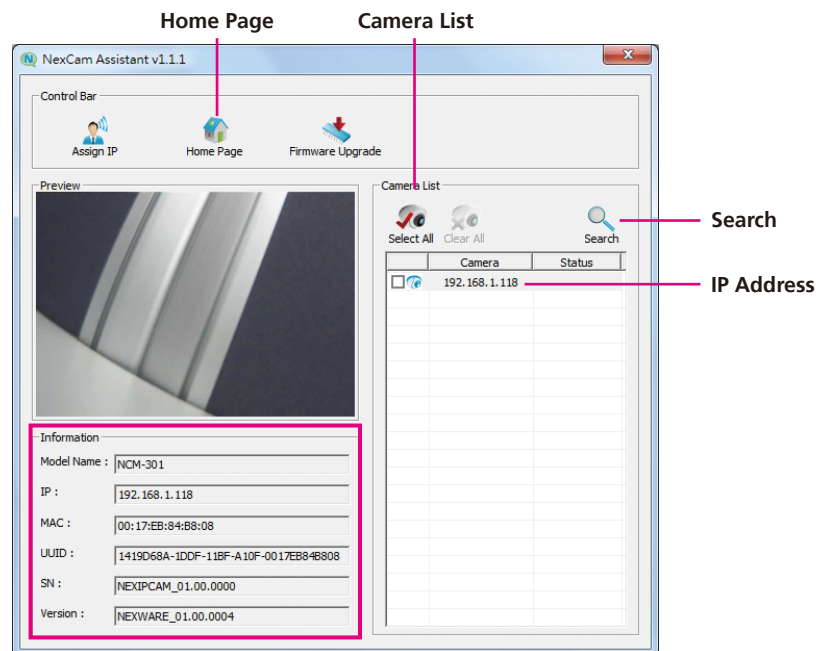

Multiple Cameras

If more than one IP camera are detected, the **Camera List** will show all the available cameras on the network. To access all the cameras' configuration menu simultaneously, click on the **Select All** button to select all the cameras in the list, then click the **Home Page** button. Similarly, you can access specific ones by ticking the camera's checkbox.

To deselect, press the **Clear All** button to remove all the selection, or specific ones by unchecking the checkbox.
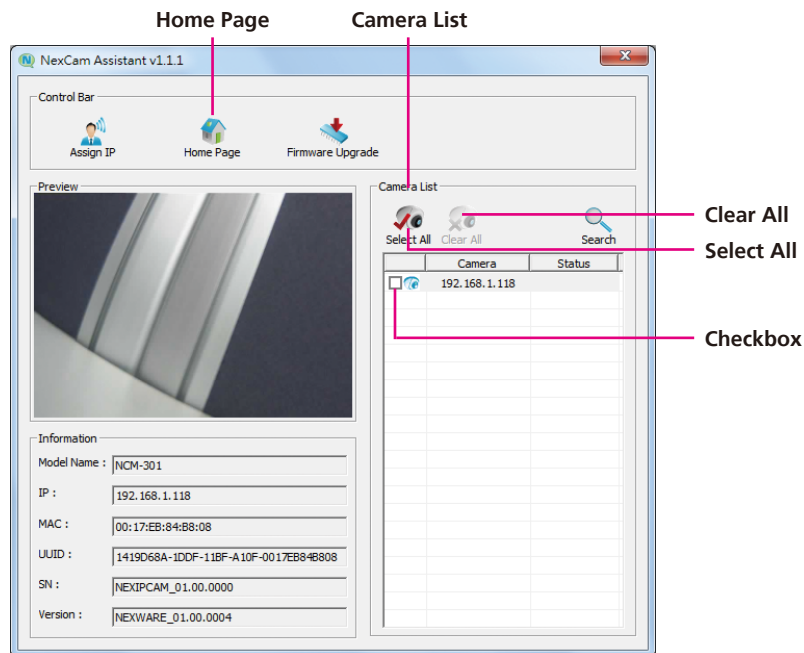

Web Browser (Internet Explorer)

1. Locate and open the Internet Explorer (IE) shortcut on the desktop.
2. In the address bar, type 192.168.1.168 (default IP address of the camera) and then press the **Enter** button.
3. You will be prompted with a pop-up window asking for login information, type in "**admin**" (default login name) and "**9999**" (default password)
4. Once logged in, you will see the main screen with video stream [stream 3]

Live view   Snapshot   Start/Stop   Viewer   Setup

Zoom Mode

PTZ/Zoom Control

Focus Control

Focus Zone
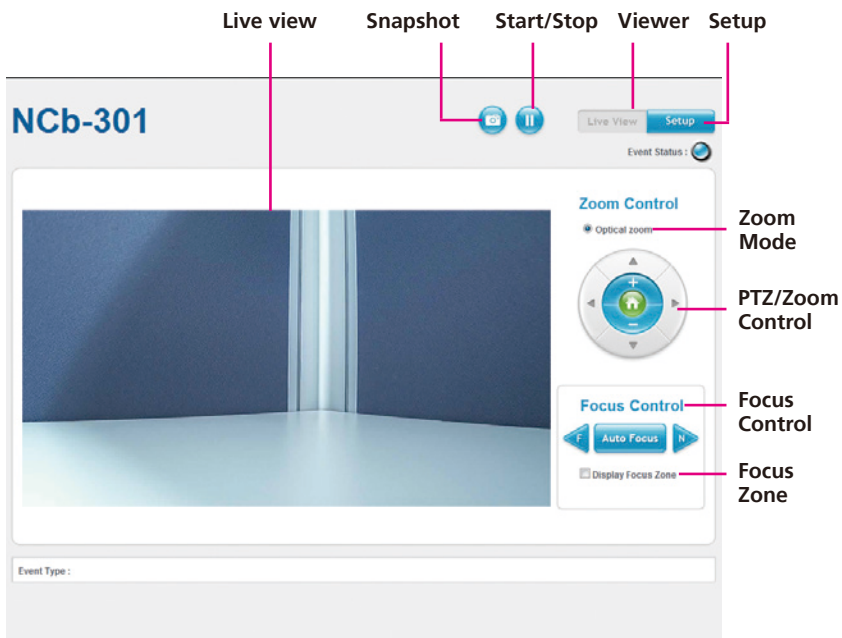

Snapshot
Takes a image snapshot from the camera, you will be prompted to store the image file onto the computer's hard drive.

Start/Stop
Press to stop the live video, press again to restart.

Viewer
Views the live video of the camera.

Setup
Options for configuring the IP camera.

Zoom Mode
Displays the current zoom mode.

PTZ/Zoom Control
Buttons used to control zooming and PTZ function.

Button	Description
	Moves the camera up, down, left and right.
	Returns the camera back to default position.
	Adjusts the camera to zoom in or out.

Focus Control

Adjusts the camera's focus. To adjust the focus automatically, press the **Auto Focus** button. To set the focus manually, press the ◄ to focus far objects, and ▶ to focus near objects.

Focus Zone

Enables or disables display of focus zone in the center of the live view (cross-hair).
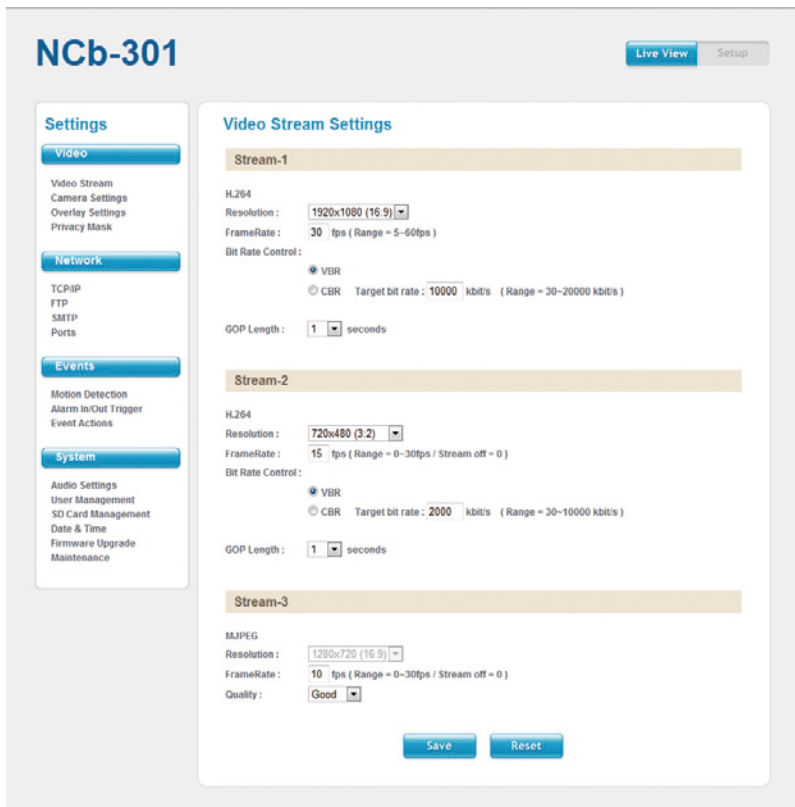

Configuring the Camera's Setting

1. To configure the camera's setting, click on the **Setup** button on the main screen to enter the configuration menu.

Setup
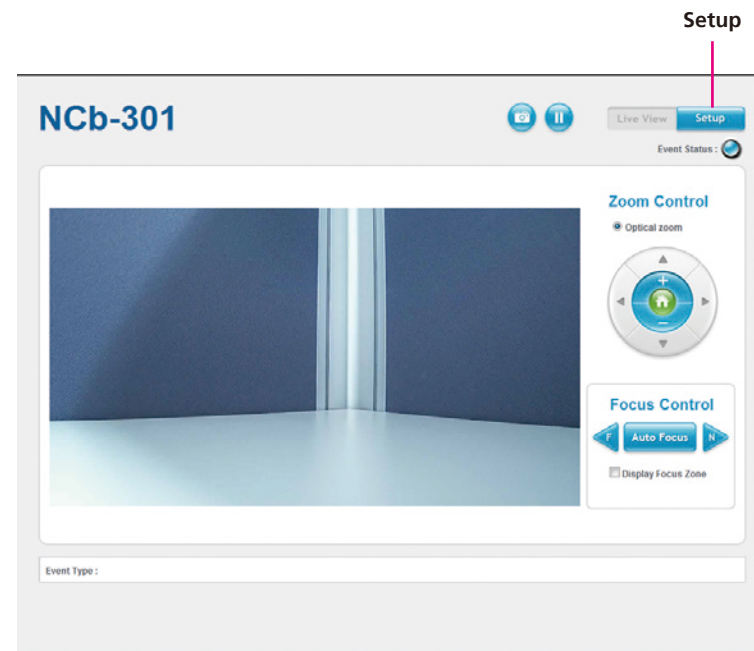

Browsing Through the Configuration Menu

The layout of the configuration menu is split into two sections. All the camera settings are located on the left hand side of the interface, clicking it will open their corresponding sub-menu on the right.

The following are the camera settings available on the left hand side:

- Video

    – Video Stream
    – Camera Settings
    – Overlay Settings
    – Privacy Mask

- Network

    – TCP/IP
    – FTP
    – SMTP
    – Ports

    – User Management
    – SD Card Management
    – Date & Time
    – Firmware Upgrade
    – Maintenance

Video

Video Stream

This section configures the settings of the video stream. There are 3 video streams available, the live video from the main screen **Viewer** is stream 1.

Video Stream Settings

Stream-1

H.264
Resolution : 1920x1080 (16:9)
FrameRate : 30 fps (Range = 5~60fps)
Bit Rate Control :
  ○ VBR
  ○ CBR Target bit rate : 10000 kbit/s (Range = 30~20000 kbit/s)

GOP Length : 1 seconds

Stream-2

H.264
Resolution : 720x480 (3:2)
FrameRate : 15 fps (Range = 0~30fps / Stream off = 0)
Bit Rate Control :
  ○ VBR
  ○ CBR Target bit rate : 2000 kbit/s (Range = 30~10000 kbit/s)

GOP Length : 1 seconds

Stream-3

MJPEG
Resolution : 1280x720 (16:9)
FrameRate : 10 fps (Range = 0~30fps / Stream off = 0)
Quality : Good

Save   Reset

Stream 1 (H.264)

Resolution

Configures the resolution of the video stream. The options are **2048x1536 (4:3)** and **1920x1080 (16:9).**

FrameRate

Adjusts the frame rate of the video stream, the range is 5~60FPS.

Bit Rate Control

Configures the Bit Rate Control mode as **VBR** (variable bit rate), or **CBR** (constant bit rate) for the stream.

Target Bit Rate

If the Bit Rate Control is set to **CBR**, you can manually set the bit rate in this field, the range is 30~20000kbit/s.

GOP Length

Configures the GOP length of the stream. The options are **0.5**, **1**, **2**, **3** and **4**, setting "**0.5 seconds**" will yield the best video quality.

Stream 2 (H.264)

Resolution

Configures the resolution of the video stream. The available options are **1280x720(16:9)**, **720x480(3:2), 720x576(5:4), 640x480(4:3)** and **320x240(4:3)**.

FrameRate

Adjusts the frame rate of the video stream. Setting **0** will disable the stream.

Bit Rate Control

Configures the Bit Rate Control mode as **VBR** (variable bit rate), or **CBR** (constant bit rate) for the stream.

Target Bit Rate

If the Bit Rate Control is set to **CBR**, you can manually set the bit rate in this field, the range is 30~10000kbit/s.

GOP Length

Configures the GOP length of the stream. The options are **0.5**, **1**, **2**, **3** and **4**, setting "**0.5 seconds**" will yield the best video quality.

Stream 3 (MJPEG)

Resolution

Displays the resolution of the video stream.

FrameRate

Adjusts the frame rate of the video stream. Setting **0** will disable the stream.

Quality

Configures the video quality of the stream. The options are **Best**, **Good** and **Normal**.

Save

Save button to apply the configurations, click on this button once all the settings are confirmed for the new changes to take effect.

Reset

Reset button to discard all the settings applied.

Image Adjustments

Brightness

Configures the brightness of the image, the range is 0 ~ 255, with 0 being the lowest brightness. Press the **<** button to decrease the value, or **>** button to increase the value. The default value is 128.

Contrast

Configures the contrast of the image, the range is 0 ~ 255, with 0 being the lowest contrast. Press the **<** button to decrease the value, or **>** button to increase the value. The default value is 128.

Color Saturation

Configures the color saturation of the image, the range is 0 ~ 255, with 0 being the lowest saturation. Press the **<** button to decrease the value, or **>** button to increase the value. The default value is 128.

Sharpness

Configures the sharpness of the image, the range is 0 ~ 255, with 0 being the lowest sharpness. Press the **<** button to decrease the value, or **>** button to increase the value. The default value is 128.

Default

Default button to discard all the settings applied to Image Adjustments.

QuickViewer

Click this button to open up a small preview window of the live video, you can view the image as you make image adjustments. Click the **Save** button for the changes to take effect.
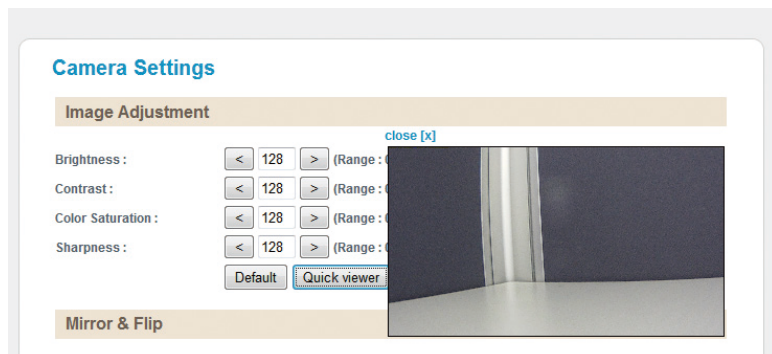

Mirror & Flip
Enable Mirror

Flip the camera image horizontally.

Enable Flip

Flip the camera image vertically.

Wide Dynamic Range (WDR)
WDR Mode

Enables or disables WDR function, enable this option if the camera is exposed to bright backlight, glare or high contrast lighting. You can specifiy the WDR constrast level as **low**, **middle** or **high**. Selecting **high** will produce the best image quality.

White Balance
White Balance Mode

Enables or disables the white balance function on the camera. White balance allows the camera to produce more accurate colors under different lighting conditions. The following modes can be selected:

Off: Disables white balance function.
Auto: Automatically adjusts the white balance to suit the current lighting condition.
Fixed Outdoor: Adjusts the white balance for outdoor daylight.
Incandescent: Adjusts the white balance for indoor light.
Fluorescent: Adjusts the white balance for fluorescent light.

Exposure
Exposure Mode

This option configures the anti-flickering function of the camera. If the image is suffering from flickering under fluorescent light, selecting **Auto** will allow the camera to automatically adjust the light frequency to match the current fluorescent lighting condition and prevent flickering. You can also manually set it to **Anti-Flicker 50Hz, Anti-Flicker 60Hz** or **Locked.**

Exposure Value Adjust

Adjusts the exposure value on the camera, the range is 0 ~ 255. Press the **<** button to decrease the value, or **>** button to increase the value. The default value is 128.

Enable Slow Shutter

Enables or disables slow shutter on the camera, you can select the shutter speed in drop the list. The options are **1/7**, **1/15**, **1/30**. Selecting a slower shutter speed will improve image quality in low light conditions, but will increase motion blur.

Enable Sens Up

Enables or disables gain setting on the camera, you can select the maximum level of amplification in the drop down list. The options are **4x**, **8x**, **16x** and **32x**. A higher value will produce brighter images, but may also increase image noise.

Enable Backlight Compensation

Enables or disables backlight compensation function, enable this option if an image in the camera is too dark.

Day & Night

Configures the day and night mode of the camera.

Auto: Allows the camera to automatically sense the current lighting level and determine what type of color range it should display.

Forced Color: Forces the camera to display color regardless of the current lighting level.

Forced
Black & White: Forces the camera to display black & white images regardless of the current lighting level.

Save

Save button to apply the configurations, click on this button once all the settings are confirmed for the new changes to take effect.

Reset

Reset button to discard all the settings applied.

Overlay Settings

This section configures the text displayed on the live video in **Viewer**.

Contents

Enable Date

Enables or disables the **Viewer** to display the current date on the bottom right corner.

Enable Time

Enables or disables the **Viewer** to display the current time on the bottom right corner.

Enable Text

Enables or disables the **Viewer** to display text on the bottom left corner. The text displayed can be configured in the field box.

Display Camera Name

Enables or disables the **Viewer** to display the camera's name on the bottom left corner. The name displayed can be configured in the **Maintenance** menu. For information on **Maintenance** menu, please refer to page 35.

Save

Save button to apply the configurations, click on this button once all the settings are confirmed for the new changes to take effect.

Reset

Reset button to discard all the settings applied.

Privacy Mask

This section configures which area of the live video in **Viewer** will be masked for privacy. A total of 3 privacy masks can be configured.

Settings

Privacy Mask Color

Selects the color of the privacy mask. The available colors are **Black** and **White**.

Mask Zones

You can configure up to 3 privacy masks, the instructions below illustrate how to setup 3 privacy masks.

1. Select the color of the mask in the drop down list.
2. To create the first mask, check the **Enable mask zone 1**, and on the live video screen below, select the area to mask by holding down the mouse button and drag to make a rectangular square, release the button once the desired area is covered.
3. Press the **Setting Area** button in **Enable mask zone 1** to set this area as mask.
4. You will see the selected area turn black or white, depending on which color was chosen (This example uses black as the mask color).

Rectangular square

Mask area

5. To create the second and third mask, check the **Enable mask zone 2** and **Enable mask zone 3** options, then repeat steps 2 to 3 outlined earlier.

To delete a mask, check the zone number you like to remove, and press the **Remove** button.

Network

TCP/IP

This section configures the network settings of the camera.

TCP/IP

Settings

Enable Motion Detection

Enables or disables motion detection function.

Sensitivity

Configures the sensitivity of motion detection, the sensitivity determines the amount of motion required to trigger an event, the range is 1 to 100, with 1 being the least sensitive. For more information on event, please refer to **Event Actions** on page 27.

Detection Zones

This section shows the live video from the camera, the screen is divided into 5x5 rectangular boxes, to setup motion detection, please follow the instructions below.

1. Check the **Enable motion detection** option, and specify the sensitivity level.
2. In the live video screen below, select the desired area for motion detection by clicking on the rectangular box. The border of the box will turn red indicating that it is selected. You can select multiple boxes, up to 5x5 boxes can be selected.
3. Press the **Save** button once all the desired areas are selected for the changes to take effect.

Reset button to discard all the settings applied.

Chapter 3: Viewing Live Video via VLC Media Player

The IP camera's live video can be viewed by third party media players such as VLC media player by VideoLAN project [http://www.videolan.org/].
To stream the live video from the camera to VLC media player through the network, please follow the instructions below.

1. Locate and open VLC media player.
2. Go to **Media** -> **Open Network Stream**.
3. Enter the following RTSP URL:

rtsp://192.168.1.168:8557/live/stream1

Note: RTSP URL of stream 1, similarly you can view stream 2 and 3 of the camera by entering their corresponding URLs. Please refer to **Ports** on page 23 for more information on the URL link.

4. Press the **Play** button to start streaming.
