Regulatory Compliance Statements

This section provides the FCC compliance statement for Class A devices and describes how to keep the system CE compliant.

Declaration of Conformity

FCC

This equipment has been tested and verified to comply with the limits for a Class A digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Operation of this equipment in a residential area (domestic environment) is likely to cause harmful interference, in which case the user will be required to correct the interference (take adequate measures) at their own expense.

CE

The product(s) described in this manual complies with all applicable European Union (CE) directives if it has a CE marking. For computer systems to remain CE compliant, only CE-compliant parts may be used. Maintaining CE compliance also requires proper cable and cabling techniques.

RoHS Compliance

NEXCOM RoHS Environmental Policy and Status Update

NEXCOM is a global citizen for building the digital infrastructure. We are committed to providing green products and services, which are compliant with European Union RoHS (Restriction on Use of Hazardous Substance in Electronic Equipment) directive 2011/65/EU, to be your trusted green partner and to protect our environment.

RoHS restricts the use of Lead (Pb) < 0.1% or 1,000ppm, Mercury (Hg) < 0.1% or 1,000ppm, Cadmium (Cd) < 0.01% or 100ppm, Hexavalent Chromium (Cr6+) < 0.1% or 1,000ppm, Polybrominated biphenyls (PBB) < 0.1% or 1,000ppm, and Polybrominated diphenyl Ethers (PBDE) < 0.1% or 1,000ppm.

In order to meet the RoHS compliant directives, NEXCOM has established an engineering and manufacturing task force to implement the introduction of green products. The task force will ensure that we follow the standard NEXCOM development procedure and that all the new RoHS components and new manufacturing processes maintain the highest industry quality levels for which NEXCOM are renowned.

The model selection criteria will be based on market demand. Vendors and suppliers will ensure that all designed components will be RoHS compliant.

How to recognize NEXCOM RoHS Products?

For existing products where there are non-RoHS and RoHS versions, the suffix "(LF)" will be added to the compliant product name.

All new product models launched after January 2013 will be RoHS compliant. They will use the usual NEXCOM naming convention.

Warranty and RMA

NEXCOM Warranty Period

NEXCOM manufactures products that are new or equivalent to new in accordance with industry standard. NEXCOM warrants that products will be free from defect in material and workmanship for 2 years, beginning on the date of invoice by NEXCOM.

NEXCOM Return Merchandise Authorization (RMA)

▪ Customers shall enclose the "NEXCOM RMA Service Form" with the returned packages.

▪ Customers must collect all the information about the problems encountered and note anything abnormal or, print out any on-screen messages, and describe the problems on the "NEXCOM RMA Service Form" for the RMA number apply process.

▪ Customers can send back the faulty products with or without accessories (manuals, cable, etc.) and any components from the card, such as CPU and RAM. If the components were suspected as part of the problems, please note clearly which components are included. Otherwise, NEXCOM is not responsible for the devices/parts.

▪ Customers are responsible for the safe packaging of defective products, making sure it is durable enough to be resistant against further damage and deterioration during transportation. In case of damages occurred during transportation, the repair is treated as "Out of Warranty."

▪ Any products returned by NEXCOM to other locations besides the customers' site will bear an extra charge and will be billed to the customer.

Repair Service Charges for Out-of-Warranty Products

NEXCOM will charge for out-of-warranty products in two categories, one is basic diagnostic fee and another is component (product) fee.

System Level

▪ Component fee: NEXCOM will only charge for main components such as SMD chip, BGA chip, etc. Passive components will be repaired for free, ex: resistor, capacitor.

▪ Items will be replaced with NEXCOM products if the original one cannot be repaired. Ex: motherboard, power supply, etc.

▪ Replace with 3rd party products if needed.

▪ If RMA goods can not be repaired, NEXCOM will return it to the customer without any charge.

Board Level

▪ Component fee: NEXCOM will only charge for main components, such as SMD chip, BGA chip, etc. Passive components will be repaired for free, ex: resistors, capacitors.

▪ If RMA goods can not be repaired, NEXCOM will return it to the customer without any charge.

Warnings

Read and adhere to all warnings, cautions, and notices in this guide and the documentation supplied with the chassis, power supply, and accessory modules. If the instructions for the chassis and power supply are inconsistent with these instructions or the instructions for accessory modules, contact the supplier to find out how you can ensure that your computer meets safety and regulatory requirements.

Cautions

Electrostatic discharge (ESD) can damage system components. Do the described procedures only at an ESD workstation. If no such station is available, you can provide some ESD protection by wearing an antistatic wrist strap and attaching it to a metal part of the computer chassis.

Safety Information

Before installing and using the device, note the following precautions:

- Read all instructions carefully.

- Do not place the unit on an unstable surface, cart, or stand.

- Follow all warnings and cautions in this manual.

- When replacing parts, ensure that your service technician uses parts specified by the manufacturer.

- Avoid using the system near water, in direct sunlight, or near a heating device.

- The load of the system unit does not solely rely for support from the rackmounts located on the sides. Firm support from the bottom is highly necessary in order to provide balance stability.

- The computer is provided with a battery-powered real-time clock circuit. There is a danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instructions.

Installation Recommendations

Ensure you have a stable, clean working environment. Dust and dirt can get into components and cause a malfunction. Use containers to keep small components separated.

Adequate lighting and proper tools can prevent you from accidentally damaging the internal components. Most of the procedures that follow require only a few simple tools, including the following:

- A Philips screwdriver

- A flat-tipped screwdriver

- A grounding strap

- An anti-static pad

Using your fingers can disconnect most of the connections. It is recommended that you do not use needle-nose pliers to disconnect connections as these can damage the soft metal or plastic parts of the connectors.

Safety Precautions

1. Read these safety instructions carefully.

2. Keep this User Manual for later reference.

3. Disconnect this equipment from any AC outlet before cleaning. Use a damp cloth. Do not use liquid or spray detergents for cleaning.

4. For plug-in equipment, the power outlet socket must be located near the equipment and must be easily accessible.

5. Keep this equipment away from humidity.

6. Put this equipment on a stable surface during installation. Dropping it or letting it fall may cause damage.

7. The openings on the enclosure are for air convection to protect the equipment from overheating. DO NOT COVER THE OPENINGS.

8. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.

9. Place the power cord in a way so that people will not step on it. Do not place anything on top of the power cord. Use a power cord that has been approved for use with the product and that it matches the voltage and current marked on the product's electrical range label. The voltage and current rating of the cord must be greater than the voltage and current rating marked on the product.

10. All cautions and warnings on the equipment should be noted.

11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.

12. Never pour any liquid into an opening. This may cause fire or electrical shock.

13. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.

14. If one of the following situations arises, get the equipment checked by service personnel:
    a. The power cord or plug is damaged.
    b. Liquid has penetrated into the equipment.
    c. The equipment has been exposed to moisture.
    d. The equipment does not work well, or you cannot get it to work according to the user's manual.
    e. The equipment has been dropped and damaged.
    f. The equipment has obvious signs of breakage.

15. Do not place heavy objects on the equipment.

16. The unit uses a three-wire ground cable which is equipped with a third pin to ground the unit and prevent electric shock. Do not defeat the purpose of this pin. If your outlet does not support this kind of plug, contact your electrician to replace your obsolete outlet.

17. CAUTION: DANGER OF EXPLOSION IF BATTERY IS INCORRECTLY REPLACED. REPLACE ONLY WITH THE SAME OR EQUIVALENT TYPE RECOMMENDED BY THE MANUFACTURER. DISCARD USED BATTERIES ACCORDING TO THE MANUFACTURER'S INSTRUCTIONS.

Technical Support and Assistance

1. For the most updated information of NEXCOM products, visit NEXCOM's website at www.nexcom.com.

2. For technical issues that require contacting our technical support team or sales representative, please have the following information ready before calling:
   – Product name and serial number
   – Detailed information of the peripheral devices
   – Detailed information of the installed software (operating system, version, application software, etc.)
   – A complete description of the problem
   – The exact wordings of the error messages

Warning!
1. Handling the unit: Carry the unit with both hands and handle it with care.

2. Maintenance: To keep the unit clean, use only approved cleaning products or clean with a dry cloth.

3. CFast: Turn off the unit's power before inserting or removing a CFast storage card.

Conventions Used in this Manual

Warning:
Information about certain situations, which if not observed, can cause personal injury. This will prevent injury to yourself when performing a task.

Caution:
Information to avoid damaging components or losing data.

Note:
Provides additional information to complete a task easily.

Safety Warning: This equipment is intended for installation in a Restricted Access Location only.

Ordering Information

The following information below provides ordering information for the NIFE 300 series.

▪ **NIFE 300 6th Generation Intel® Core™ i7/i5/i3 LGA Fanless Automation System (P/N: 10J70030000X0)**
▪ **NIFE 300P2 6th Generation Intel® Core™ i7/i5/i3 LGA Fanless Automation System with PCI/PCIe Expansion (P/N: 10J70030001X0)**
▪ **NIFE 300P2E 6th Generation Intel® Core™ i7/i5/i3 LGA Fanless Automation System with PCI/PCIe Expansion (P/N: 10J70030002X0)**
▪ **NIFE 300P3 6th Generation Intel® Core™ i7/i5/i3 LGA Fanless Automation System with Expansions (P/N: 10J70030003X0)**
▪ **NIFE 300E16 6th Generation Intel® Core™ i7/i5/i3 LGA Fanless Automation System with PCI/PCIe Expansions (P/N: 10J70030004X0)**
▪ **24V, 120W AC to DC power adapter w/o power cord (P/N: 7400120029X00) For all above systems**
▪ **24V, 180W AC to DC power adapter w/o power cord (P/N: 7400180008X00) Compatible with NIFE 300E16**

CHAPTER 1: PRODUCT INTRODUCTION

Overview

NIFE 300

NIFE 300P2/P2E/E16

NIFE 300P3

Key Features

- Support 6th generation Intel® Core™ i7/i5/i3 LGA1151 socket type processors

- Intel® Q170 PCH

- 1 x DVI-D, and 1 x HDMI for dual independent display support

- 3 x Intel® GbE LAN ports; support WoL, teaming and PXE

- 4 x USB 3.0, 2 x USB 2.0 and 2 x RS232/422/485 auto

- 1 x front access 2.5" SATA HDD tray

- 2 x Mini-PCIe sockets support optional modules and mSATA device

- 1 x external CFast socket and 1 x SIM card socket

- Support +24VDC input; support ATX power mode

- PCI/PCIe expansions (NIFE 300P2/P2E/E16 and NIFE 300P3 only)

Hardware Specifications

CPU Support

- Support 6th generation Intel® Core™ i7/i5/i3 LGA socket type processors
  - Core™ i7-6700TE, quad core, 3.4GHz, 8M cache
  - Core™ i5-6500TE, quad core, 3.3GHz, 6M cache
  - Core™ i3-6100TE, dual core, 2.7GHz, 4M cache
  - Pentium® G4400TE, dual core, 2.9GHz, 3M cache
  - Celeron® G3900TE, dual core, 2.6GHz, 2M cache

Main Memory

- 2 x DDR4 2133 SO-DIMM sockets, support up to 16GB

Display Option

- Dual independent display
  - HDMI + DVI-D

Front I/O Interface Status LEDs

- 1 x Battery/ 1 x C-Fast LEDs
- 4 x GPO status/ 2 x TX/ RX LEDs
- 1 x Power/ 1 x HDD access LEDs

Front I/O Interface

- 1 x ATX power on/off switch
- 1 x HDMI and 1 x DVI-D
- 4 x USB 3.0 ports (900mA per each)
- 2 x USB 2.0 ports (500mA per each)
- 1 x Line-out and 1 x Mic-in
- 2 x Antenna holes for Wi-Fi/GSM
- 1 x Front access 2.5" HDD tray

- 1 x Mini-PCIe expansion supports optional modules
- 2 x RS232/422/485 auto with 2.5KV Isolation

Top I/O Interface

- 1 x 3-pin remote switch
- 1 x CFast expansion
- 1 x SIM card

Storage Device

- 1 x CFast (SATA 3.0)
- 1 x 2.5" HDD (external, SATA 3.0)
- 1 x 2.5" HDD (internal, SATA 3.0)
- 1 x mSATA (via internal Mini-PCIe socket)

Expansion Slot

- NIFE 300: No expansion
- NIFE 300P2: Two PCI expansion slots
  - Add-on card length: 180mm max
  - Power consumption: 10W/ slot max
- NIFE 300P2E: One PCI expansion slot, and one PCIe x8 expansion slot
  - Add-on card length: 180mm max
  - Power consumption: 10W/ slot max
- NIFE 300P3: Two PCI expansion slots and one PCIe x8 expansion slot
  - Add-on card length: 180mm max
  - Power consumption: 10W/ slot max
- NIFE 300E16: One PCIe x16 expansion slot
  - Add-on card length: 180mm
  - Power consumption: 30W/ slot max

Power Requirements

- AT/ATX power mode (default with ATX power mode)
- Power input: typical +24VDC +/ - 20%
- Power adapter: optional AC to DC power adapter (+24Vdc, 120W)

Dimensions

- NIFE 300: 90 mm(W) x 185mm (D) x 251mm (H)
- NIFE 300P2: 155 mm(W) x 185mm (D) x 251mm (H)
- NIFE 300P2E: 155 mm(W) x 185mm (D) x 251mm (H)
- NIFE 300E16: 155 mm(W) x 185mm (D) x 251mm (H)
- NIFE 300P3: 175 mm(W) x 185mm (D) x 251mm (H)

Construction

- Aluminum and metal chassis with front access design

Environment

- Operating Temperature:
  Ambient with air flow: -10°C to 60°C (according to IEC60068-2-1, IEC60068-2-2, IEC60068-2-14)
- Storage Temperature: -20°C to 85°C
- Relative Humidity: 10% to 93% (non-condensing)
- Shock Protection:
  - HDD: 20G, half sine, 11ms, IEC60068-27
  - CFast: 50G, half sine, 11ms, IEC60068-27
- Vibration protection w/HDD condition:
  - Random: 0.5Grms @ 5~500 Hz, IEC60068-2-64
  - Sinusoidal: 0.5Grms @ 5~500 Hz, IEC60068-2-6

Certifications

- CE Approval
  - EN61000-4-2
  - EN61000-4-4
- FCC Class A
- LVD

OS Support Lists

- Windows 7 32-bit and 64-bit
- Windows 8.1 32-bit and 64-bit

CHAPTER 2: JUMPERS AND CONNECTORS

This chapter describes how to set the jumpers and connectors on the NIFE 300 series motherboard.

Before You Begin

▪ Ensure you have a stable, clean working environment. Dust and dirt can get into components and cause a malfunction. Use containers to keep small components separated.

▪ Adequate lighting and proper tools can prevent you from accidentally damaging the internal components. Most of the procedures that follow require only a few simple tools, including the following:
  – A Philips screwdriver
  – A flat-tipped screwdriver
  – A set of jewelers screwdrivers
  – A grounding strap
  – An anti-static pad

▪ Using your fingers can disconnect most of the connections. It is recommended that you do not use needle-nosed pliers to disconnect connections as these can damage the soft metal or plastic parts of the connectors.

▪ Before working on internal components, make sure that the power is off. Ground yourself before touching any internal components, by touching a metal object. Static electricity can damage many of the electronic components. Humid environments tend to have less static electricity than dry environments. A grounding strap is warranted whenever danger of static electricity exists.

Precautions

Computer components and electronic circuit boards can be damaged by discharges of static electricity. Working on computers that are still connected to a power supply can be extremely dangerous.

Follow the guidelines below to avoid damage to your computer or yourself:
▪ Always disconnect the unit from the power outlet whenever you are working inside the case.

▪ If possible, wear a grounded wrist strap when you are working inside the computer case. Alternatively, discharge any static electricity by touching the bare metal chassis of the unit case, or the bare metal body of any other grounded appliance.

▪ Hold electronic circuit boards by the edges only. Do not touch the components on the board unless it is necessary to do so. Don't flex or stress the circuit board.

▪ Leave all components inside the static-proof packaging that they shipped with until they are ready for installation.

▪ Use correct screws and do not over tighten screws.

Jumper Settings

A jumper is the simplest kind of electric switch. It consists of two metal pins and a cap. When setting the jumpers, ensure that the jumper caps are placed on the correct pins. When the jumper cap is placed on both pins, the jumper is short. If you remove the jumper cap, or place the jumper cap on just one pin, the jumper is open.

Refer to the illustrations below for examples of what the 2-pin and 3-pin jumpers look like when they are short (on) and open (off).

Two-Pin Jumpers: Open (Left) and Short (Right)
Three-Pin Jumpers: Pins 1 and 2 are Short
Locations of the Jumpers and Connectors for NIFB 300

The figure below is the top view of the NIFB 300 main board which is the main board used in NIFE 300 series. It shows the locations of the jumpers and connectors.

CHAPTER 3: SYSTEM SETUP

Installing a CPU

1. Remove the 4 flat screws on the top cover.
2. Lift up the cover and remove it from the chassis.

3. Remove the mounting screws that secure the heat sink to the chassis.
4. The CPU socket is readily accessible after you have removed the heat sink.

Load lever
Retention tab

5. Unlock the socket by pushing the load lever down, moving it sideways until it is released from the retention tab; then lift the load lever up.
6. Insert the CPU into the socket. The triangular edge on the CPU must align with the corner of the CPU socket shown on the photo.
The CPU's notch will at the same time fit into the socket's alignment key.

Alignment key

Alignment key

CAUTION!
- Handle the CPU by its edges and avoid touching the pins.
- The CPU will fit in only one orientation and can easily be inserted without exerting any force.

7. Close the load plate and then hook the load lever under the retention tab.

8. Apply thermal paste on top of the CPU.
CAUTION! Do not force the CPU into the socket. Forcing the CPU into the socket may bend the pins and damage the CPU.

39 NIFE 300 Series User Manual

9. Tighten the screws to secure the heat sink in place.
Installing a SO-DIMM Memory Module

1. Remove the chassis before installing a SO-DIMM module.

2. Locate the SO-DIMM memory sockets.
Memory sockets

3. Insert the memory module into the socket.
4. Apply even pressure to both ends of the module until it is locked by the latches.
5. Ensure the memory module is installed straight.
6. Insert another SO-DIMM module into the socket and apply even pressure to both ends of the module until it is locked by the latches.
Installing a SIM Card

1. Locate the mini-PCIe slot and remove the bracket first.
2. Locate the SIM card holder.
**SIM card
holder**

3. Release the SIM card cover and place the SIM card into the holder.
4. Close the cover and secure the SIM card into position.

45 NIFE 300 Series User Manual
Installing a CFast Card

1. Locate the CFast socket on the top cover.
CFast cover

2. Remove the cover of the CFast socket.

3. Insert the CFast card into the socket.

4. Ensure the CFast card is installed and engaged firmly with a click sound.
Installing a 3G/GSM Module

1. Install the 3G/GSM module into the 3G/GSM slot.
2. Fix the antenna cable to the 3G/GSM module.
3. Locate the antenna hole on the front panel, and insert the antenna jack through the hole.

4. Fix the antenna jack with rings.
5. Install the antenna.

Installing an mSATA Module (NIFE 300 Only)

The following instructions apply to NIFE 300 only.

1. Remove the mini-PCIe cover on the side panel.
2. Locate the mini-PCIe socket, then install and fix the mSATA module into the socket.
3. Ensure both screws are fixed tightly to the socket.

Installing an mSATA Module (NIFE 300P2/P3/P2E/E16/E3)

The following instructions apply to NIFE 300P2/P2E/E16/P3/E3.

1. Remove the side panel.

2. Locate the mini-PCIe socket, then install and fix the mSATA module into the socket.
3. Ensure both screws are fixed tightly to the socket.
Installing an External SATA Hard Drive

1. Remove the external HDD cover.

2. Pull out the HDD bracket and place the HDD into the bracket.
HDD cover

3. Fix the HDD onto the HDD bracket from the bottom side using screws.
4. Install the HDD bracket into the external HDD drive bay, and secure the external HDD cover back to the drive bay.

Installing an Internal SATA Hard Drive

1. Remove the chassis cover.

2. Locate the internal HDD bracket.
HDD bracket

3. Install and fix the HDD to the internal HDD bracket.
Installing a PCI or PCIe Card

The following instructions apply to NIFE 300P2/P2E/E16/P3/E3, and does not apply to NIFE 300.

1. Remove the side panel.
2. Locate and remove the screw on the PCI/PCIe bracket cover.
3. Remove the plastic screw holder if the height of the PCI/PCIe card is sufficient.

4. Install the PCI/PCIe card into the slot.
5. Fix the screw on the PCI/PCIe cover, and close the bracket cover for the PCI/PCIe expansion.
PCI Volts Configuration on NIFE 300 Riser Cards

The PCI Volts is configured to 5V as default on all NIFE 300 riser cards.

Model	Riser Configuration	Riser Jumper Location	Default Volts Setting
NIFE 300P2	2x PCI Slots	JP3 2-3(5V), 1-1(3.3V)	2-3
NIFE 300P2E	1x PCI Slot and 1x PCIe Slot	JP2 2-3(5V), 1-1(3.3V)	2-3
NIFE 300P3	2x PCI Slots and 1x PCIe Slot	JP3 2-3(5V), 1-1(3.3V)	2-3

Wallmount Mounting

The main mounting method of the NIFE 300 series is wallmount. Please locate the wallmount fixing holes at the rear of the NIFE 300 series for wallmount mounting.
CHAPTER 4: BIOS SETUP

This chapter describes how to use the BIOS setup program for the NIFE 300 series. The BIOS screens provided in this chapter are for reference only and may change if the BIOS is updated in the future.

To check for the latest updates and revisions, visit the NEXCOM website at www.nexcom.com.tw.

About BIOS Setup

The BIOS (Basic Input and Output System) Setup program is a menu driven utility that enables you to make changes to the system configuration and tailor your system to suit your individual work needs. It is a ROM-based configuration utility that displays the system's configuration status and provides you with a tool to set system parameters.

These parameters are stored in non-volatile battery-backed-up CMOS RAM that saves this information even when the power is turned off. When the system is turned back on, the system is configured with the values found in CMOS.

With easy-to-use pull down menus, you can configure items such as:
▪ Hard drives, diskette drives, and peripherals
▪ Video display type and display options
▪ Password protection from unauthorized use
▪ Power management features

The settings made in the setup program affect how the computer performs. It is important, therefore, first to try to understand all the setup options, and second, to make settings appropriate for the way you use the computer.

When to Configure the BIOS

▪ This program should be executed under the following conditions:
▪ When changing the system configuration
▪ When a configuration error is detected by the system and you are prompted to make changes to the setup program
▪ When resetting the system clock
▪ When redefining the communication ports to prevent any conflicts
▪ When making changes to the Power Management configuration
▪ When changing the password or making other changes to the security setup

Normally, CMOS setup is needed when the system hardware is not consistent with the information contained in the CMOS RAM, whenever the CMOS RAM has lost power, or the system features need to be changed.

Default Configuration

Most of the configuration settings are either predefined according to the Load Optimal Defaults settings which are stored in the BIOS or are automatically detected and configured without requiring any actions. There are a few settings that you may need to change depending on your system configuration.

Entering Setup
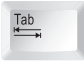

When the system is powered on, the BIOS will enter the Power-On Self Test (POST) routines. These routines perform various diagnostic checks; if an error is encountered, the error will be reported in one of two different ways:

- If the error occurs before the display device is initialized, a series of beeps will be transmitted.

- If the error occurs after the display device is initialized, the screen will display the error message.

Powering on the computer and immediately pressing <Del> allows you to enter Setup.

Press the Del key to enter Setup:
Legends

Key	Function
← →	Moves the highlight left or right to select a menu.
↑ ↓	Moves the highlight up or down between sub-menus or fields.
Esc	Exits the BIOS Setup Utility.
+	Scrolls forward through the values or options of the highlighted field.
−	Scrolls backward through the values or options of the highlighted field.
Tab	Selects a field.
F1	Displays General Help.
F2	Load previous values.
F3	Load optimized default values.
F4	Saves and exits the Setup program.
Enter	Press <Enter> to enter the highlighted sub-menu

Scroll Bar

When a scroll bar appears to the right of the setup screen, it indicates that there are more available fields not shown on the screen. Use the up and down arrow keys to scroll through all the available fields.

Submenu

When "▶" appears on the left of a particular field, it indicates that a submenu which contains additional options are available for that field. To display the submenu, move the highlight to that field and press [Enter] .

BIOS Setup Utility

Once you enter the AMI BIOS Setup Utility, the Main Menu will appear on the screen. The main menu allows you to select from several setup functions and one exit. Use arrow keys to select among the items and press Enter, to accept or enter the submenu.

Main

The Main menu is the first screen that you will see when you enter the BIOS Setup Utility.

System Language
Configures the default language of the system.

System Date
The date format is <day>, <month>, <date>, <year>. Day displays a day, from Monday to Sunday. Month displays the month, from January to December. Date displays the date, from 1 to 31. Year displays the year, from 1999 to 2099.

System Time
The time format is <hour>, <minute>, <second>. The time is based on the 24-hour military-time clock. For example, 1 p.m. is 13:00:00. Hour displays hours from 00 to 23. Minute displays minutes from 00 to 59. Second displays seconds from 00 to 59.

Advanced

The Advanced menu allows you to configure your system for basic operation. Some entries are defaults required by the system board, while others, if enabled, will improve the performance of your system or let you set some features according to your preference.

⚠ Setting incorrect field values may cause the system to malfunction.

FAN Setting
Configures the speed of the fan, the options are Always Full Speed, Enable Smart Fan and Disable.

System Temperature
Detects and displays the current system temperature.

CPU Temperature
Detects and displays the current CPU temperature.

Fan1 Speed
Detects and displays fan1 speed.

Fan2 Speed
Detects and displays fan2 speed of the riser card.

VCore
Detects and displays the Vcore CPU voltage.

+3V
Detects and displays 3.3V voltage.

+12V
Detects and displays 12V voltage.

+5V
Detects and displays 5V voltage.

CPU Configuration

This section is used to configure the CPU.

Hyper-threading
Enables or disables hyper-threading technology.

Active Processor Cores
Select the number of cores to enable in each processor package.

Intel® Virtualization Technology
Enables or disables Intel Virtualization technology. When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.

Intel® SpeedStep™
Enables or disables Intel SpeedStep.

CPU C States
Enables or disables CPU C States support.

SATA Configuration

This section is used to configure the SATA drives.

```

```

Primary IGFX Boot Display
Select the video device which will be activated during POST. This has no effect if external graphics is present. Secondary boot display selection will appear based on your selection. VGA modes will be supported only on primary display.

Secondary IGFX Boot Display
Select the secondary display device.

LCD Panel Type
Select the LCD panel used by the internal graphics device by selecting the appropriate setup item.

Panel Scaling
Select the LCD panel scaling option used by the internal graphics device.

Backlight Control
Select the backlight control mode.

BIA
The options are Auto, Disabled and Level 1 to Level 5.

Spread Spectrum Clock Chip
Select how the spread spectrum clock is controlled.

Hardware   Controlled by the chip.
Software   Controlled by the BIOS.

Active LFP
Select the Active LFP configuration.

No LVDS   VBIOS does not enable LVDS.
eDP Port-A   LFP driven by Int-DisplayPort encoder from Port-A

Panel Color Depth
Select the LFP panel color depth.

Security

```
           Aptio Setup Utility - Copyright (C) 2015 American Megatrends, Inc.
     Main      Advanced    Chipset   Security     Boot     Save & Exit

     Password Description                                    Set Administrator Password

     If ONLY the Administrator's password is set,
     then this only limits access to Setup and is
     only asked for when entering Setup.
     If ONLY the User's password is set, then this
     is a power on password and must be entered to
     boot or enter Setup. In Setup the User Will
     have Administrator rights.
     The password length must be
     in the following range:
     Minimum length                3
     Maximum length               20                         →←: Select Screen
                                                             ↑↓: Select Item

```

Setup Prompt Timeout
This section configures the number of seconds to wait for the setup activation key. 65535(0xFFFF) denotes indefinite waiting.

Bootup NumLock State
This allows you to determine the default state of the numeric keypad. By default, the system boots up with NumLock on wherein the function of the numeric keypad is the number keys. When set to Off, the function of the numeric keypad is the arrow keys.

Quiet Boot

Enabled   Displays OEM logo instead of the POST messages.
Disabled   Displays normal POST messages.

Boot Option Priorities

Adjust the boot sequence of the system. Boot Option #1 is the first boot device that the system will boot from, next will be #2 and so forth.

Fast Boot

Enables or disables fast boot technology to speed up the system boot time. This is achieved by skipping specific tests during BIOS POST routine.

Hard Drive BBS Priorities

Sets the order of the legacy devices in this group.

Save & Exit

Save Changes and Exit

To save the changes and exit the Setup utility, select this field then press <Enter>. A dialog box will appear. Confirm by selecting Yes. You can also press <F4> to save and exit Setup.

Discard Changes and Exit

To exit the Setup utility without saving the changes, select this field then press <Enter>. You may be prompted to confirm again before exiting. You can also press <ESC> to exit without saving the changes.

Save Changes and Reset
To save the changes and reset, select this field then press <Enter>. A dialog box will appear. Confirm by selecting Yes.

Discard Changes and Reset
To exit the Setup utility without saving the changes, select this field then press <Enter>. You may be prompted to confirm again before exiting.

Save Changes
To save changes and continue configuring the BIOS, select this field then press <Enter>. A dialog box will appear. Confirm by selecting Yes.

Discard Changes
To discard the changes, select this field then press <Enter>. A dialog box will appear. Confirm by selecting Yes to discard all changes made and restore the previously saved settings.

Restore Defaults
To restore the BIOS to default settings, select this field then press <Enter>. A dialog box will appear. Confirm by selecting Yes.

Save as User Defaults
To use the current configurations as user default settings for the BIOS, select this field then press <Enter>. A dialog box will appear. Confirm by selecting Yes.

Restore User Defaults
To restore the BIOS to user default settings, select this field then press <Enter>. A dialog box will appear. Confirm by selecing Yes.

Boot Override
To bypass the boot sequence from the Boot Option List and boot from a particular device, select the desired device and press <Enter>.

Launch EFI Shell From Filesystem Device
Launches the EFI shell.

APPENDIX A: POWER CONSUMPTION

Power Consumption Management

Purpose

The purpose of the power consumption test is to verify the power dissipation of system, and the loading of power supply.

Test Equipment

PROVA CM-07 AC/DC CLAMP METER

Device Under Test

DUT: sys#1/

Test Procedure

1. Power up the DUT, boot into Windows 7 x32 Professional.
2. Entering standby mode (HDD power down).
3. Measure the power consumption and record it.
4. Run Burn-in test program to apply 100% full loading.
5. Measure the power consumption and record it.

Test Data

	Sys #1
	+24V
Full-Loading Mode	2.1A
Total	50.4W
Standby S3 Mode	0.4A
Total	9.8W

APPENDIX B: WATCHDOG PROGRAMMING GUIDE

ITE8786E WatchDog Programming Guide

```
#define Superio_Port        0x2E
#define Superio_LDN         0x07

;*Enter the MB PnP mode with 0x87, 0x01, 0x55, 0x55
outportb(Superio_Port, 0x87);
outportb(Superio_Port, 0x01);
outportb(Superio_Port, 0x55);
outportb(Superio_Port, 0x55);

;*Set LDN=0x07 point to the WDT function
outportb(Superio_Port, Superio_LDN);
outportb(Superio_Port+1, 0x07);

;*Setup configuration register 0x72, if set 90h is second, set 10h is minute (WDT output through PWRGD)
outportb(Superio_Port, 0x72);
outportb(Superio_Port+1, 0x90);

;*Setup WDT time-out value. this demo code is used to program the time-out value with 4 sec.
outportb(Superio_Port, 0x73);
outportb(Superio_Port+1, 0x04);

;*Exit the MB PnP Mode
outportb(Superio_Port, 0x02);
outportb(Superio_Port+1, 0x02);
```

APPENDIX C: GPI/O PROGRAMMING GUIDE

GPI/O (General Purpose Input/Output) pins are provided for custom system design. This appendix provides definitions and its default setting for the ten GPI/O pins in the NIFE 300 series. The pin definition is shown in the following table:

Pin	GPI/O Mode	PowerOn Default	Address	Pin	GPI/O Mode	PowerOn Default	Address
1	VCC	-	-	2	GND	-	-
3	GPI	Low	A07h (Bit0)	4	GPO	Low	A07h (Bit4)
5	GPI	Low	A07h (Bit1)	6	GPO	Low	A07h (Bit5)
7	GPI	Low	A07h (Bit2)	8	GPO	Low	A07h (Bit6)
9	GPI	Low	A07h (Bit3)	10	GPO	Low	A07h (Bit7)

JP2 – GPI/O Connector

Pin	GPI/O Mode	PowerOn Default	Address
A4	GPO	Low	A00h (Bit6)
A3	GPO	Low	A00h (Bit5)
A2	GPO	Low	A02h (Bit7)
A1	GPO	Low	A02h (Bit6)

LED4 – GPO LED

Control the GPO pin (4/6/8/10) level from I/O port A07h bit (4/5/6/7).
Control the GPO pin (A3/A4) level from I/O port A00h bit (5/6).
Control the GPO pin (A1/A2) level from I/O port A02h bit (6/7).
The bit is Set/Clear indicated output High/Low

GPIO programming sample code

```
#define GPIO_PORT        0xA00

#define GPO4_HI              outportb(GPIO_PORT+7, 0x10)
#define GPO4_LO              outportb(GPIO_PORT+7, 0x00)
#define GPO6_HI              outportb(GPIO_PORT+7, 0x20)
#define GPO6_LO              outportb(GPIO_PORT+7, 0x00)
#define GPO8_HI              outportb(GPIO_PORT+7, 0x40)
#define GPO8_LO              outportb(GPIO_PORT+7, 0x00)
#define GPO10_HI             outportb(GPIO_PORT+7, 0x80)
#define GPO10_LO             outportb(GPIO_PORT+7, 0x00)
#define GPOA4_HI             outportb(GPIO_PORT, 0x40)
#define GPOA4_LO             outportb(GPIO_PORT, 0x00)
#define GPOA3_HI             outportb(GPIO_PORT, 0x20)
#define GPOA3_LO             outportb(GPIO_PORT, 0x00)
#define GPOA2_HI             outportb(GPIO_PORT+2, 0x80)
#define GPOA2_LO             outportb(GPIO_PORT+2, 0x00)
#define GPOA1_HI             outportb(GPIO_PORT+2, 0x40)
#define GPOA1_LO             outportb(GPIO_PORT+2, 0x00)

void main(void)
{
  GPO4_HI;
  GPO6_LO;
  GPO8_HI;
  GPO10_LO;
  GPOA4_HI;
  GPOA3_LO;
  GPOA2_HI;
  GPOA1_LO;
}
```

APPENDIX D: RISER CARD 3.3V AND 5V JUMPER CONFIGURATION

Model	Riser Card	PCI/PCIe Combination	Riser Jumper Location and Setting
NIFE 300	No Riser Card	N/A	N/A
NIFE 300E16	NISK300E16	1x PCIe x16	No Jumper
NIFE 300P2E	NISK300P1E1	1x PCIe x8 & 1x PCI	NISK300P1E1 Table
NIFE 300P2	NISK300P2	2x PCI	NISK300P2 Table
NIFE 300P3	NISK300P2E1	1x PCIe x8 & 2x PCI	NISK300P2E1 Table
NIFE 300E3	NISK300E3	1x PCIe x8 & 2x PCIe x4	No Jumper

NISK300P1E1 Jumper Setting and Location

PCI_VIO (JP2)

Pin	Status	Function Description
1-2 On (Default)	Short	VCC3
2-3 On	Short	VCC5
